WEATHER OF CONCERN

Weather of Concern

Southern California

A strong Santa Ana wind event will bring strong and widespread northeast winds through this evening

- A moderate to strong Santa Ana wind event will create locally wind driven swells that will impact east facing harbors such as Avalon Harbor on Catalina Island and Smuggler's Cove on Santa Cruz Island beginning Friday morning and continuing through Saturday morning.
- In the Los Angeles and Ventura County mountains, widespread damaging wind gusts of 60 to 80 mph are expected, while coastal and valley areas will likely see damaging wind gusts of 40 to 60 mph.
- A strong Santa Ana wind event will impact areas from metro Orange County to the Inland Empire and the adjacent mountains and passes.
- Red Flag Warnings in effect until 1800 this evening for areas in Los Angeles, Ventura, San Bernardino, Riverside, Orange Counties

Active Weather Warnings, Watches and Advisories by County:

WEATHER SYNOPSIS BY REGION

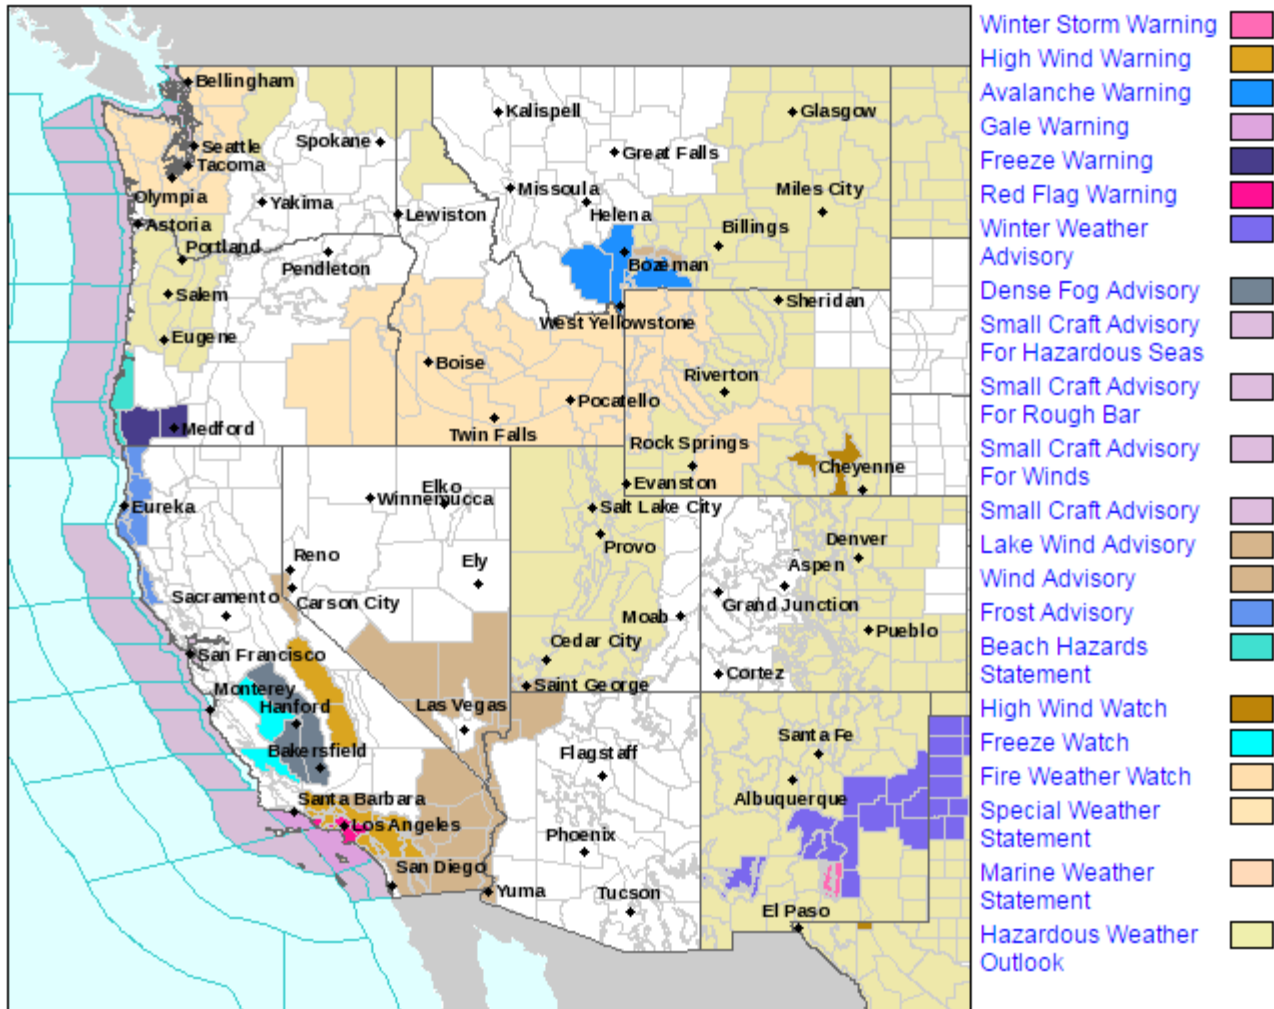

NORTHERN CALIFORNIA

A dry northwesterly to northerly flow aloft will be over Northern California today. Although there will be some mid and high clouds at times, precipitation is not expected. High pressure will be the dominant feature, and some sheltered low spots will see strong inversions form, and low stratus and fog may develop. Wind-prone areas from the western Sierra slopes to the coastal range will see north to northeast surface winds gust to 20-30 mph, mainly in the mornings. Late tomorrow the next Pacific storm system will approach the North Coast. Clouds and south to southwest winds will increase late in the day and overnight. Snow levels will be 4000-5000 feet. Most areas will just see more wind and clouds tomorrow, however, a second system will spread more light rain and snow across the northern half of Northern California Monday evening. Snow levels will be 2000-4000 feet. Stronger and wetter systems are expected toward the mid to latter parts of next week.

SOUTHERN CALIFORNIA

Temperatures will warm around 10 degrees today and another few degrees tomorrow as a ridge of high pressure builds into California from the Pacific. Minimum humidity will drop into the single digits and teens away from the San Joaquin Valley and its surrounding foothills this weekend. North to northeast winds of 20 to 40 mph with gusts to 60 mph will surface across much of Southern California this evening. A Pacific trough will drop down the West Coast bringing well below normal temperatures and a chance of showers with light rainfall totals early next week. This trough will also bring strong westerly winds to the mountain ridges and desert passes early next week.
